

ACKNOWLEDGEMENTS

Many people have contributed to the assembly of data and generation of ideas on the Hamilton Group, its fossils and paleoecology. CB and GB are grateful to many early mentors and colleagues who fostered, guided, and inspired our interests in studying the Devonian of New York, many of them now sadly passed, including Richard Beerbower, Art Boucot, Zeddie P. Bowen, Jim Brower, Ed Buehler, Don Fisher, Thomas Grasso, Phil Heckel, Bill Kirchgasser, Dick Liebe, Bob Linsley, Bill Oliver, Jr., Dave Raup, Larry Rickard, Jim Scatterday, Bob Sutton, and Don Woodrow. We have also benefitted from input of our contemporaries and research collaborators: Craig Clement, John Cottrell, Niles Eldredge, Linda Ivany, Gerry Kloc, Bruce Lieberman, David Linsley, George McIntosh, Arnie Miller, Kathy Newton, Jeff Over, Brad Sageman, and Bruce Selleck. We are also grateful to include a stellar cast of past Masters and PhD students, many of who helped in mapping, measuring, sampling, and interpreting Hamilton units as a part of their theses and dissertations. These include in chronological order of degrees: from the University of Rochester: Vince Dick (MS, 1982), Lee Gray (PhD, 1984), Mike Savarese (MS, 1984), Steve Speyer (MS, 1982; PhD, 1986), Karla Parsons (Parsons-Hubbard; MS, 1988), Keith Miller (MS, 1988), Charles Ver Straeten (PhD, 1995); Donna Carlson (Jones; MS, 1998), from SUNY Fredonia: Loren Babcock, Walt Meyer, and Stephen Mayer; and from the University of Cincinnati: Alex Bartholomew (MS, 2002; PhD, 2006), Jocelyn Sessa (2003), James Bonelli (MS, 2003), Mike DeSantis (PhD, 2010), James Zambito (PhD, 2011), and Andrew Zaffos (2015); many of these former students continue to contribute to Hamilton Group research in their professional careers, as peers.

Our research on the Middle Devonian strata of New York was funded by grants from the American Chemical Society, Petroleum Research Fund, National Science Foundation grants EAR-8313103 (1984-1986), EAR-8816856 (1988-1989), EAR-921807 (1992-1997; with Niles Eldredge), and EAR-9725441 (1998-1999; with Brad Sageman); US Geological Survey Statemap Grants (1994, 1997-1998, 2000, 2002-2003, 2004).

Finally, a special thanks to Tim Phillips for help in drafting figures and to Betty Lou Brett for her ongoing support and help in many ways including photography and general good advice.
